## **Density And Speed**

## Across

- 4. Icebergs (non salty) are less dense than salty seawater and
- 8. This is what you observe when you use the overflow-can to determine the volume of an irregular shaped object.
- 9. \_\_\_\_\_g/cm3 . Density of water!

## Down

- 1. The amount of space taken up by an object.
- 2. The distance an object travels per unit
- 3. The rate of change of velocity.
- 5. The amount of matter in an object.
- 6. Density is really the amount of \_\_\_\_\_ (mass) in an object per unit volume.
- 7. Speed in a given direction!
